

Erratum

To: G.A. Freiman, “New analytical results in subset-sum problem”, Discrete Mathematics 114 (1993) 205–218.

Unfortunately, due to a printing error, the text on page 218 of volume 114 had not been printed. Page 218 should read as follows.

Note. During the Israel-French conference on combinatorics (November 1988, Jerusalem) Professor Paul Erdős told me about similar results of Professor András Sárközy. Several days ago, just before submitting this paper, I had obtained from A. Sárközy, reprints of his papers with Professor P. Erdős (see [12, 13, 4, 5]). There, results are obtained in a different, elementary way. This interplay of elementary and analytical methods will as usual contribute to the research.
